

# Invitation to SOx Emissions Innovation Challenge FINALS

Venue: DTU Skylab, Diplomvej, Building 373A, 2800 Kgs. Lyngby

May 3, 2017

Funded by

THE DANISH  
MARITIME FUND

From 2020 international regulations of SOx emissions below 0.5% are implemented. How do authorities ensure compliance with the rules? And how do we secure a level playing field for the maritime industry? Students from DTU have been working together with Maersk, Boeing, The Danish Maritime Authority, The Danish Environmental Agency and DTU to solve the challenge. Join us for inspirational talks and students presenting their ideas for future maritime shipping. And take part in the great finals, when the judges reveal the winners of the competition.
