

**MAY 25th 9.00-18.00 - At DTU Skylab**

**The DTU course 41633 Innovation & Product Development presents:**

# Spin-Out Day 2016

During a 13 week project course, 22 teams consisting of DTU students with various academic competencies have worked on finding viable applications for their individual high-tech patents/inventions. Through a process of market research, product development, prototyping and test of application setting, the teams are now ready to pitch their ventures and show their product prototypes to potential investors and entrepreneur enthusiasts of the Danish startup community.

## DTU Mechanical Engineering Department of Mechanical Engineering
