DENMARK

Accelerate your business in one of the world's most innovative and digitalised countries with exceptional ease of doing business and a vibrant startup community. Denmark strives to become a living laboratory for experimenting with smart technologies which could address challenges posed by urbanisation and climate change. This comes with a particular focus on data-driven smart solutions, and manifests itself in a number of tech R&D investment, and testing facilities.

Being one of the leading smart cities in the world, Copenhagen offers opportunities for smart city tech startups such as investment as well as the possibility to collaborate with the public sector in Denmark. The high taxes in this country goes hand in hand with high living standards and expensive living.

STARTING A COMPANY

When looking for people to grow and develop your business, you will be holding a pretty good hand in Denmark.

The level of education is very high, everyone speaks perfect English, the pool of tech talent is extremely deep and, more importantly, it is available and eager to work at startups. Denmark ranks top in terms of university-industry cooperation and offers Scandinavia’s most knowledge-intensive research and business environment.

If you are a tech startup, you will find many highly qualified people for jobs in both management and engineering, owing to for example the Technical University of Denmark (DTU), which is one of the learning engineering institutions in Europe, and Copenhagen Business School, which is one of Europe’s largest business schools.

The tight startup community and super high level of trust make it easy to connect and share experiences with everybody in the community.
WHERE TO SIT
**BLOXHUB**

BLOXHUB is the Nordic Hub for sustainable urbanization. Join their ecosystem of companies, organizations, scientists and cities and help make our cities better.

They live in a 9,000 m² co-working space in two neighbour buildings in the heart of Copenhagen with approx. 120 member companies / 700 people.

FB-bloxhub  bloxhub.org  mki@bloxhub.org

---

**FOUNDERS HOUSE**

Founders House is known for its cool vibe and homey surroundings. It's where entrepreneurs meet other entrepreneurs. It's where we improve and develop. In other words, it's where big ideas become reality.

What sets them apart is their ability to bring people together. Connecting people and enhancing collaboration between members is their most meaningful objective.

They also host exciting, thought-provoking and inspirational talks and meetups. You can hire their space for events such as meetups, meetings, talks and workshops. Awarded best coworking space in 2017

FB-FoundersHouseCPH  foundershouse.dk  zenia@thecreatorscommunity.com

---

**GREEN TECH CENTER**

Green Tech Center is a triple helix innovation playground where dedicated green companies, authorities, research and educational institutions cooperating on development and marketing of new products and concepts.

Their team of consultants can advise and spar with you in the following areas: Green Start Up, Energy Check & Optimization, Innovation & Business Development, Seed & Venture Capital, Internationalization & Export, Competence & Employee Development, Inventor Counselling, Design & Product Development, Network.

FB- greentechcenter  greentechcenter.dk  dbc@greentechcenter.dk

---

**FUTUREBOX**

Are you a hardware or deep tech startup? Do you want to excel your business? Then the Futurebox incubator is just the place for you.

At DTU Science Park, you find Denmark’s largest and leading deep tech community. Deep tech is characterized by lengthy time-to-market, high capital intensity and technology risk and complexity.

The objective of the incubation program is to help you as a deep tech startup identify and develop a scalable business model.

Linkedin-dtu-science-park  dtusciencepark.com
**INQVATION**

They back start-ups when being sure that their operational skill set, experience and network will bring an original vision to life.

They don’t pick and choose specific industries, but invest wholeheartedly in teams that believe in the change they bring.

Their ecosystem of competencies gives entrepreneurs the courage, the strength and the stamina to create stuff that makes people fitter, or happier or more productive.

FB-inqvation  Linkedin-inqvation  inqvation.dk

---

**MATRIKEL1**

Matrikel1, part of The Creators Community, is an innovation hub that gathers individuals with an entrepreneurial mindset.

It is the largest creators’ community in the Nordics, with 1,300 members and 300 companies. Notable companies include Kahoot!, Spotify, Vivino, Snapchat, Douchebags, Realm, Index Ventures, Northzone, Creandum.

Both MESH (2015) and Founders House (2017) have been awarded Best Coworking Space in the Nordics. The Creators Community run all their sites without any governmental funding.

Linkedin-matrikel1  matrikel1.com

---

**ODENSE ROBOTICS STARTUP HUB**

You and your company will have access to a coworking space and a community whose primary goal is to create an optimal environment for start-ups and entrepreneurs, which we do, among others, by reinvesting profits in new initiatives that benefit entrepreneurs and start-ups.

We offer you and your business a focused network and a present and accessible community that develops new ideas, provides new knowledge, and forges new relationships within selected industries, and where the right people are brought together across the likes of entrepreneurs, universities, corporates, clusters, etc.

Linkedin- odense-robotics  odenserobotics.dk
**SOHO**

In the heart of the Meat Packing District in Copenhagen, Soho offers all the benefits from a co-working space.

Here you’ll find the option of privacy within your own office. Great for companies who need a private space but also seek all the perks of a large community. They also have more than 15 different and uniquely themed meeting rooms, ranging from 4-80 people.

Book the one that suits your purpose, whether you need to sign a contract, break the ice or let the inspiration flow.

soho.dk  info@soho.dk

**SYMBION**

You and your company will have access to a coworking space and a community whose primary goal is to create an optimal environment for startups and entrepreneurs, which we do, among others, by reinvesting profits in new initiatives that benefit entrepreneurs and start-ups.

We offer you and your business a focused network and a present and accessible community that develops new ideas, provides new knowledge, and forges new relationships within selected industries, and where the right people are brought together across the likes of entrepreneurs, universities, corporates, clusters, etc.

FB- scale-up-denmark  scale-updenmark.com

---

**URBANTECH**

Non-equity, pilot-focused innovation program hosted in Denmark for startups that are using technology to accelerate the development of sustainable cities.

30 startups from all over the world participate in a screening process to select the 10 startups being selected for the acceleration programme developing their urban technology related product/service.

FB- Urbantech  urbantechprogram.io
WHERE TO GET FUNDING
“You need to be asking yourself the question: Why do we want to scale? Then the pieces for the puzzle of how, when and where will come together.

-Sophie Bech, Business Developer in DTU Skylab
From Coinify, Conferize to Reapplix and MonTa Biosciences – they’ve been on their journey and have seen it all.

Gust and Fundacity have recognized them twice as the most active seed investor in Europe and in the Top 10 globally. The reason for this, they believe, is because they do the very best to get to know their teams and how they work, prioritize, adapt and execute.

Their investment activities are an extension of the accelerator programs – they only invest in startup companies that participate in their program. Since 2012, we have made 67 pre-seed investments in startups.

accelerace.io

byFounders is an early stage venture fund actively investing in tech startups across the Nordics and Baltics.

Made up of some of the region’s most accomplished entrepreneurs, the byFounders Collective invests and supports the next generation of globally ambitious founders. Venture Capital and Private Equity For founders, byFounders.

byfounders.vc

A national, not-for-profit network improving the possibilities for private investors to invest in potential growth companies and game-changing startups.

Activity highlights: 180 Angel members, 192 Startup Deals, 22 Invested (M€) Angel investor member requirements and membership application process Investor members should have 400k euros in liquid investment capacity.

The board approves membership applications submitted through website. Approximate yearly startup deal flow and investment sum made by members. 192 startup investments made in 2016 worth 22 million euro.

FB- DanBAN.orgH danban.org

Eventhough this is primarily a nationally focused offer, they have several international funding options. And work not only by softfunding, but are well renouned as innovative players and trusted advisors amongst danish businesses.

innovationsfonden.dk
KEYSTONES

Keystones is a fast growing network of Danish company builders: business angels, serial-entrepreneurs and executives living across the world with a shared love for entrepreneurship.

Keystones is specialized in the art of angel investing and new business development. Through more than a decade, they’ve built a strong reputation for helping hundreds of Danish startups, business leaders and angel investors partner up with one another.

As a result they’ve served the largest accelerators, funds, public partners and angel networks across Denmark as an engine for sourcing, screening and qualification of high-potential companies

keystones.dk

NORTH EAST VENTURE

North-East Venture is an international, multi-stage fund. The fund was launched December 1st 2013 as the venture branch of North-East Family Office.

Their portfolio primarily contains investment in non-listed growth companies within four verticals: Fintech, Re-commerce and online market places, Consumer lifestyle and sustainability, AI and VR/AR.

Linkedin-Nort East Ventures
north-east-venture.com lbm@nev.nu

NORTHCAP VENTURES

These guys are looking for entrepreneurs in the ICT field and particularly within cloud computing (SaaS), communications, mobile/mobility, online services and e-commerce.

They invest in companies with the ambition and potential to grow internationally. They help fund companies in three stages of development: Seed, Early stage and Growth.

northcap.vc twk@northcap.vc
VF VENTURE

Vaekstfonden is the Danish state's investment fund. They strive to improve access to risk capital to enable businesses to innovate, and to generate growth and new job, in close collaboration with banks and domestic and international private investors, we finance companies from all sectors.

They can accompany you for the entire journey – from your company's infancy through growth phases to expansion abroad and even to an initial public offering. If your enterprise is a start-up company, Vaekstfonden offers a range of financing options depending on your business needs.

The various types of financing offered are tailored to the various types of business plans. If your enterprise e.g. has an aggressive growth plan with high scalability ambitions, a convertible loan may be your first step towards greater access to capital if you are not yet quite ready to take on a direct investor. Or perhaps your enterprise has the prospect of more moderate growth, then long-term financing may be a suitable option giving your enterprise solid access to risk financing without the offer of equity interests in return.

seedcapital.dk  ubs@seedcapital.dk

SUNSTONE

Sunstone Life Science Fund III K/S focusses on Danish, Nordic and European seed and start-up companies within biotech, medtech and diagnostics.

Sunstone LSV Fund III is managed by the venture company Sunstone Capital that focusses on developing and expanding early stage technology and life science companies.

The new fund, Sunstone Life Science Ventures Fund III K/S, increases Sunstone Capital's assets under management to over DKK five billion.

vf.dk  jhh@vf.dk

SEED CAPITAL

Known for their high level of professionalism and exceptional value add services that help companies achieve their goals.

Besides investments, they assist companies with value-generating activities such as management support, business development, organizational and strategic planning, marketing, and ad hoc operational, financial, and legal assistance.

The experience gained over the years from over 300 investment cases has given them an ability to find founding teams with the ‘X factor’ necessary for success. They invest in people more than anything, those with an idea that can be turned into a scalable business, and who can attract talent, customers and investors.

seedcapital.dk  ubs@seedcapital.dk
ACTIVITIES AND EVENTS

HIGH TECH SUMMIT
High Tech Summit is part conference, part exhibition and part networking activities. Their vision is to create the largest research-based tech meeting in Denmark. High Tech Summit is the perfect environment for companies, startups, organisations, and universities to meet and present their latest technological developments. However, High Tech Summit is about much more than presentation. It is the ideal place to debate the most recent discoveries, participate in matchmaking events, and generate new ideas.

SCIENCE & COCKTAILS
Science & Cocktails is an initiative that brings science and entertainment closer together by creating a series of public lectures intertwined with music/art performances and smoky dry-ice chilled cocktails in your hand. Scientific knowledge is in general not considered accessible by many and, like any other form of information, it travels from researcher to journalist and is finally transmitted through the usual media channels. Science & Cocktails aims to create a relaxed platform where researchers and audience are on equal footing and conversations can be easily followed side by side with your favorite scientist.

TECHBBQ
TechBBQ is the largest annual summit for startups and innovation in Denmark and Greater Copenhagen. At TechBBQ, they bring together talent, capital, and knowledge to reach our common goals: support the startup ecosystem, celebrate our successes, and learn from our failures. You don’t want to miss it!
“Place yourself in a space, where you can get a great network no matter if it’s a hub or an incubator. Participate in their events, and you will melt into and be able to take advantage of the Danish startup ecosystem immediately.”

-Frederik Neble, Founder Obital
RESOURCES TO TAP INTO

BOOTSTRAPPING

Bootstrapping.dk is a new independent digital media focusing on Denmark's future. Bootstrapping.dk writes for and about the people changing society, the entrepreneurs, the startups and the high technology development challenging welfare state, public institutions and industry changing and challenging the way we coexist and live together as human beings.

DANISH ASSOCIATION OF RESEARCH AND TECHNOLOGY ORGANISATIONS

They seek to make new technological methods applicable to businesses and promote businesses uptake of new technology. The GTS institutes therefore have a key role to play particularly for SMEs in the Danish innovation system, because they can ensure better and more efficient use of new research and technology by Danish businesses. In so doing they increase and promote innovation, productivity, and growth in Danish society.

HEY FUNDING

Matchmaking platform for startups and investors. But the organisation has also mapped the entire ecosystem, and you can use the tool for free, if you are a startup.
RESOURCES TO TAP INTO

TECHSAAVY

Dedicated to the people behind Danish and Nordic startups. Determined to bridge the gap between startups and corporates by promoting startups and their solutions for a more innovative and hence more sustainable future.

techsavvy.media

THE HUB

The Hub is a free-of-charge community platform tailored to the needs of growth startups. The Hub gives an overview of the Nordic startup community by providing visibility to startups in Denmark, Sweden, Finland, Norway and Northern Ireland.

Targeted growth startups based in the above-mentioned countries, who are facing various challenges related to scalability. These challenges can be related to recruitment, funding or other insights. As a startup, you might be looking to expand your team in order to build or scale, looking for funding, or being in the need of best practice tools such as a pitch deck or employment contract.

thehub.io
SUPPORTERS OF THE ECOSYSTEM
“The startup community in Denmark is tied up to the general “startup” values: Sharing your story, the upsides, but also the lows and fuckups! It’s a super international space, come join!!

-Britta Ravn, Business Developer in CSE
**CONNECT DENMARK**

Connect Denmark offers pitch training, expert-mentor panels and matchmaking between startups and candidates for board positions.

connectdenmark.com

**COPERNHAGEN CAPACITY**

They have assisted international companies in establishing business in Greater Copenhagen for more than 20 years; Nordic headquarters, sales offices, shared services centres, research and development centres, logistics centres and much more. So they feel confident of saying that their long experience will reduce your time-to-market in Greater Copenhagen.

They can help you all the way: Before: Information gathering & analysis, During: Business establishment, After: Expansion & business development. They can advice on legal and corporate structure matters, hook you up with lawyers, accountants and banks to get your business infrastructure up and running, recommend office spaces and shared office facilities, and they can introduce you to potential partners, exciting startups, cluster networks, public authorities, research institutions and trade associations.

copcapp.com

**COPENHAGEN BUSINESS HUB**

Copenhagen Business Hub – Erhvervscentrum Hovedstaden is your gateway to the many opportunities and benefits offered by Danish Agencies for Trade Promotion.

They provide unbiased guidance to startups and companies in pursuit of your goals, be it product development, management, sales, finance, new market entry, recruitment – as well as key trends within digitalisation, sustainability, and more.

Their team of professional advisors have substantial experience from the private sector. Through their own experience and the knowledge gained from meeting with the thousands of entrepreneurs, executives, funds, investors, EU representatives, advisors and universities they recognize and understand the many challenges that startups face.

ehhs.dk
STARTUP DENMARK

Startup Denmark is a visa scheme for non-EU/EEA entrepreneurs. You apply on the basis of a business plan which is evaluated by an independent expert panel. If the panel approves your business plan, you are eligible to apply for a residence and work permit as a self-employed entrepreneur. The permit is granted for a period of up to two years with the possibility of extension for three years at a time.

Startup Denmark is for self-employed persons, and only non-EU (European Union) and non-EEA (European Economic Area) citizens can apply. A non-EU/EEA citizen can submit a business plan together with EU/EEA citizens if they are part of the team behind the start-up. However, EU/EEA citizens do not need residence and work permits for Denmark due to the EU rules on free movement of persons and services.

startupdenmark.info

DANISH DESIGN CENTER

The Danish Design Centre develops and runs a series of projects that explore how design can create value within different areas: From cities and welfare to new technologies and business models.

Powered by the Danish Design DNA, we wish to unite, strengthen and develop the Danish startup ecosystem, allowing startups to scale faster.

FB-danskdesigncenter danskdesigncenter.dk/

INNOVATION CENTRE DENMARK

Denmark has Innovation Centres in Shanghai, Silicon Valley, Boston, Munich, São Paulo, New Delhi, Seoul, and Tel Aviv. Their purpose is to help Danish research institutions and companies with access to foreign knowledge, networks, technology, capital and market opportunities.

ufm.dk kra@ufm.dk
You have probably used a product or service from an Estonian inventor before, whether you knew it or not. Tallinn is recognised as a startup capital of Europe, producing some of the most innovative, new software and technology. These modern ideas were preceded by historical inventions that have changed science, technology and business. Estonia is about 50% nature, so you will experience some amazing sites no matter where you go. Estonia is a land of unicorns. We have 4 unicorn startups and 2 to-become-unicors lined up. It makes the ratio of the startup companies worth 1B€+ highest per capita. Estonia is a land of Skype - after that a lot of stuff happened.

Today they have 1000 startups, 400m€ invested in startups annually. Next to that, they have easy legislation system, open business environment that thanks to e-Residency programme is open to the rest of the world, too. Next to that, startups can get Startup Visa to relocate easier to Estonia. International House of Estonia helps expats with various services.

Estonia might just be one of the smallest ecosystems but it’s also the leanest and most exciting one to encounter. The enthusiasm and forward-thinking translated to a viral term #EstonianMafia and the ties that you create here are long-lasting!

Through a startup scene consisting of tech incubators, accelerators and community events growing 30% growth per year, you will gain access to the local ecosystem and its key players. In this interconnected network, incubators and accelerators help you to meet with local investors and business angels; various programs provide mentoring and support to bring your tech-driven ideas to the market. Thanks to a remarkably tech-savvy government, a global-first mindset, and the ability to incorporate a company online in less time than it takes to drink a cup of coffee, Estonia welcomes digital nomads from all over the world.
WHERE TO SIT
LIFT99 Tallinn Hub is the flagship of Estonian Startup Community and the go-to place for founders. Home of the #EstonianMafia. They are located in the trendiest area - the Telliskivi Creative City, and host the hottest startup events weekly. This space has a strong founder2founder network.

LIFT99.co

Spring Hub is a coworking space that provides a work space for freelancers, small businesses and teams. They focus on community and productive environment which helps the development of our members. They have all the facilities for productive work from a silent work zone to meeting rooms and free coffee in a cafe-lounge for greeting guests. The community life is supported by a Community Manager, different members events and a welcoming vibe for all new people. One of the biggest coworking space in Estonia.

Springhub.org info@springhub.org

FORWARDSPACE

This coworking space is based in Pärnu, a smaller town in Estonian "summer capital". Very cool founder community. Forwardspace offers startups and freelancers an office space and inspiring environment. In addition to 24 desk spaces we also organize different workshops and events.

forwardspace.ee info@forwardspace.ee
TEHNOPOL

This space based in the tech campus, you can rent coworking desk or entire office. It’s a tech/business campus, test with Tallinn university of Technology (testing grounds); maker-labs in the universities and Tehnopol campus. PS: Skype and Starship were founded here.

tehnopol.ee info@tehnopol.ee

UMA

UMA offers shared workspace and service solutions for companies of all sizes. Their locations are based in business districts within the Nordic and Baltic Sea region. In our workspaces you can work efficiently and flexibly, either in the privacy of your own serviced offices or as part of our open working community.

umaworkspace.com maakri@umaworkspace.com

WORKLAND

Workland provides flexible tailor-made solutions for people in need of workspace, virtual office or meeting rooms. Their fully serviced centres can be found in prime locations across the Baltic States. This is considered by local founders to be a very good locations, growing community.

hello@startupincubator.ee
“The superlative of almost every word, is -EST and the ever-growing Estonian startup community lives up to it we aim to be the friendliest, coolest, cosiest ecosystem out there!

-Triin Ilves,
Tehnopol Community Manager
WHERE TO GET FUNDING
ESTONIAN BUSINESS ANGELS NETWORK ESTBAN

Estonian Business Angels Network, established in late 2012, is an umbrella organization for business angels and business angel groups seeking investment opportunities in Estonia and its neighbouring regions with an aim to grow the quantity and quality of local seed stage investments. At EstBAN, we are looking for startups that need between EUR 20 000 to EUR 500 000 in capital. If you have a company that has a unique idea, we are interested in taking a closer look at you. We will look at any industry except real estate and gambling and also contribute to the development of regional entrepreneurship and startup ecosystem.

estban.ee  info@estban.ee

FUNDERBEAM

They are on a mission to shake up traditional models of equity funding. For founders, they don’t think it’s enough just to help you get your business funded. They think it’s important you get the right funding, and that you feel supported throughout and beyond your fundraising journey. So whether you’re looking for international exposure, in-house legal support, a dedicated Account Manager, or a diverse investor network ranging from Angels and VC’s to ‘the crowd,’ they will get you to where you need to go.

funderbeam.co  markets@funderbeam.com
KARMA VC

Tallinn

Karma Ventures (karma.vc) is an early-stage venture capital firm, specialised in late seed and A round investments in Europe’s most promising tech startups. We back companies with strong ideas delivered with unique technology, customer traction and global ambition. karma.vc accompanies entrepreneurs in figuring out the path to growth in all aspects - commercial, strategic and technical. They believe in open and honest dialogue and the active hands-on-attitude. Investing in companies that create innovative technologies in ICT field and have initial commercial traction.

karma.vc

NORDIC ANGEL PROGRAM

Tallinn

Nordic Angel Program (NAP) is an international cross-border training and investing program for business angels. The Nordic & Baltic area is known from producing some of the most exciting startups in the world, often supported by local angels. Nordic Angel Program offers a channel to build relations to these active local angels and together evaluate and invest in potential growth companies. NAP facilitates cross-border angel syndicates and shares angel investments’ best practices. Led by experienced local angels, NAP offers a unique opportunity to invest as a group in promising growth companies linked by leading startup events in Denmark, Estonia, Finland, and Norway.

nordicangelprogram.com

NORDIC NINJA VC

Helsinki, Finland

The back Entrepreneurs and Investors with bold goals to make the world a bit better and more interesting. They expect startups to have Ninja Intelligence* and a kick-ass mindset. Together you will learn along the way! They love tech, especially robotics, automation, health tech, AI and mobility, but open-minded. Their ideal investments are around 2-4 million euros, following the standard terms in the Nordics like seriesseed.fi and Startupdocs. They also love to co-invest with the local investors, but if needed, happy to lead as well. They are a venture capital firm with over 100 million euros for supporting scale-up goals in the Nordic and Baltic regions.

nordicninja.vc  hello(at)nordicninja.vc
**TRIND VC**

They invest primarily in Northern and Central Europe, ICT-driven companies creating significant impact in their niches. Any industry sector with a manageable capex is interesting to us. They want to work with hardworking teams who have attracted their first happy customers. Companies with a long-term path to a defensible competitive position. They start from the seed round, initially committing €0.1-0.5 million. They could lead a seed round or be a syndicate member with business angels and other investors. Follow-on, investing up to €3 million per company.

*tera.vc  tera@tera.vc*

**PROTOTRON**

Prototron was created to help turn smart and innovative ideas into tangible prototypes to grow into major businesses. Up to 35 000€ equity free funding and mentoring. STARTUP ESTONIA

CyberTech startups develop technologies, processes, and practices that are designed to protect networks, computers, programs, and data from attack, damage, or unauthorized access, including application security, information security, network security, disaster recovery, business continuity planning, operational security, and end-user education. The goal of CyberTech focus is to strengthen the local CyberTech startup ecosystem, grow the number of new CyberTech startups and support the development of existing startups in the sector.

startupestonia.ee
“Coming to Estonia, it's easy to meet people. The events and the culture are informal.

-Lucas Galan, Founder Neinor Homes
Lithuania attracts the global attention as a fintech center. Besides, building up operational centers in Lithuania remains very popular, like Uber and Danske Bank did. The country attracts global companies and startups because of the tech talents that are cheaper than other EU countries.

Lithuania has been busy transforming itself into a very startup-friendly country in recent years. The country ranks first in the CEE for collaboration between universities and industry for R&D; it has some of the lowest taxes in Europe and the lowest costs of living; a highly skilled workforce; and Vilnius has been ranked one of the top ten smart cities in the world by CNN.

Lithuania is also known for good internet, IT specialists, and the biggest part of younger generation speaks 2-3 languages.

AGENCY FOR SCIENCE, INNOVATION AND TECHNOLOGY

Vilnius

The Agency for Science is a national innovation agency. MITA provides free of charge services for clients from business, science and public sectors, interested in possibilities to develop strong cooperation relations with international partners and get financial support for research and innovation projects.

The main activity is the coordination of national activities and international programmes (HORIZON2020, EUREKA, EUROSTARS) of research, technological development and innovation and other financial schemes (innovation vouchers, protection of industrial property rights). MITA provides national financial support for projects participants. They also promotes business and science cooperation, commercialization of research and protection of intellectual property rights.

mita.lrv.lt
Over the past five years, the Polish innovation scene has literally exploded with opportunities. The number of tech startups doubled and a lot of new initiatives and organization has emerged. Big players entered the game (e.g. Google Campus), including corporate accelerators (e.g. Orange) or other initiatives designed to stimulated relationships between startups and corporates. Internationalisation and corporate innovation got to be prioritized by governments and other players. As of now, a lot of banks and energy companies in particular are interested in corporate-startup innovation.

The five Polish cities have become the biggest Polish innovation hubs, serving as homes to about 65% of all Polish startups. Warsaw and Krakow are the two mainstream stars of a Polish startup - and tourism - scene. The are followed Wroclaw, Lublin and Tri-city - less internationally renowned, but very successful examples of Polish entrepreneurial spirit.

Polish ecosystem is one of the leading innovation ecosystems of the CEE region.

The main local startup scenes in the country (as of 2019) are: Warsaw, Wroclaw, Cracow, Lublin and Gdansk with other cities (including Poznan) to follow, most of them developing their services rapidly. For example, it has been estimated that in 2019 there are twice as many startups as 5 years prior, so the numbers are growing. Nevertheless, most of them are still concentrating their efforts on the domestic market (est. that 60% of them in 2019 have no foreign clients).

As far as financing goes, a lot of young entrepreneurs would turn to public/state grants rather than the VCs. The startup-corp rates cooperation have took off in 2018/2019, mainly thanks to publicy funded programs (e.g. Poland Prize). There are first good practices, successfull cases of cooperation, as well as first failures. One of the main barriers holding back the success so far was a significant difference in values, culture and expectations between a big corporate companies and startups, with the former having more power in the relationships.
WHERE TO SIT
AVIATION VALLEY

Aviation Valley lies in this more unknown but beautiful part in southeastern Poland. It’s famous for its aerospace industry and pilot training centers.

They have a lot of different kind of linkage to the industry and a good university. It’s a beautiful place very close the mountains. If you are a startup who can work remotely from anywhere, this could be a great, and cheap place to work out of.

Aviation Valley also have some high quality opportunities for production facilities.

Among services addressed to enterprises you can find innovation audits, mentoring and consulting packages and the opportunity to join the Virtual Business Incubator, which allows to register your company at a prestigious address without necessity to rent a room.

technopark.gliwice.pl  info@akceleratorgliwice.pl

POLAND - WHERE TO ACCELERATE
WHERE TO GET FUNDING
BRIDGE ALFA

Bridge Alfa is aimed at funding ideas in the seed stage, where the risk of investment failure is greatest, but can be verified at relatively low cost. Thus, the capital gap will be closed, which prevents scientists from getting into business with their projects. The investors will receive non-refundable support, which NCRD gives them for the creation of an investment vehicle.

Through the vehicle, ideas of high commercialization potential will be selected. They will enter the market by ensuring that they pass through the phase of proof of principle and proof of concept and all services necessary to transform into spin-offs. Non-refundable funding from NCRD amounts to 80% and the support an individual project can count on amounts to about PLN 1 million.

INNOVATION NEST

Innovation Nest is a Venture Capital fund based in Krakow, which was founded by P. Wilam & M. Kapturkiewicz. It focuses mainly on high tech early stage startups. Investment model of the fund is strongly based on building a relationship with Silicon Valley. Innovation Nest mainly supports B2B SaaS startups which want to expand their business globally.

innovationnest.co

HUGE THING X SPEEDUP

Apply for SpeedUp Proof of Principle and get a grant to verify your technology. The SpeedUp PoP grant is for innovators from Poland that develop technology and want to commercialize it.

SpeedUp PoP gives you the opportunity to receive a 50K PLN grant for the purpose of verifying the technology idea. PoP, or Proof of Principle, is a phase consisting of a preliminary assessment of the potential of an R&D project, analysis of the competitive environment, defining the research plan, and the first milestones of the R&D Project development.

hugething.vc

SPEEDUP VENTURE GROUP

SpeedUp Venture Group is a leading group of venture funds, investing in enterprises in an early stage of development.

Areas of our interest include enterprises and entrepreneurs in CEE, who want to conquer the global market by utilizing their self-developed solutions. It creates opportunities, but also entails risk, because in a world of technological entrepreneurship, it becomes difficult to replicate a success of businesses, whose main focus is a local market, what until recently, was driving a development of the European economies.

They are looking for innovations from areas such as: consumer internet, electromobility, energy, fintech, martech, adtech, medtech, IoT, AI and hardware.

speedupgroup.com
"Go global as soon as you can!"

ACTIVITIES AND EVENTS

STARTUP STAGE
Events organised by Innovation Nest, within a widely understood area of startups. During the meetings visionaries speak, whose ingenuity and work surprise and motivate people to act.

STARTUP WEEKEND
Techstars Startup Weekend is a 54 hour event that brings together designers, developers, entrepreneurs, and experts from all domains to do amazing things. All Techstars Startup Weekend events follow the same basic model: anyone is welcome to pitch their startup idea and receive feedback from their peers. Teams form around the top ideas (as determined by popular vote) and embark on a three-day frenzy of business model creation, coding, designing, and market validation. The weekend culminates with presentations in front of local entrepreneurial leaders with another opportunity for critical feedback.

WOLVES SUMMIT
Besides being an annual event, Wolves summit is also a virtual matchmaking platform between startups, investors and corporates where they can enjoy round table discussions, presentations, panel sessions, workshops, and moderated networking meetings. Join their Virtual Partners’ Expo Zone: face-to-face with experts from across the world, or participate in The Great Pitch Contest for startups that happens once a month during Wolves Summit Live. Startups that choose this option receive priority access to present their ideas.

INFOSHARE
Get to know hundreds of technology lovers. Make new friends, expand your network and have fun during lunch at food trucks or networking parties. 11 stages to get you inspired and make you gain new knowledge about digital marketing, growth, new trends and technology. On the expo you'll find tech companies booths, as well as high five with your favourite speakers.
INNOSHARE
innoshare.pl
Innoshare happens at Copernicus Science Centre and it’s the only place in the world gathering scientists, innovators and entrepreneurs. It’s also a series of educational and informational events in Poland and abroad, the main theme of which are high technologies, research and development (R & D / B + R), cooperation between business and science, and the internationalization of startups and research. These guys gathers a variety of participants: university talent – entrepreneurial scientists, students, and PhD students, innovators from the startup environment, deep tech projects, and R&D companies, representatives of innovation and startup ecosystems from various parts of the world, international tech entrepreneurs and investors, Polish international community dealing with science, innovation, and entrepreneurship, partners and participants who want to realize their business, research, and social goals.

STARTUP SUMMIT
eu-startups.com
The biggest conference organized by the Polish Agency for Enterprise Development. During the 2-day long event, entrepreneurs can meet technology brokers and VCs.

STARTING A COMPANY

Let's be fair. The Spanish big cities are famous for many things, such as its food, blue skies, football, arts scene, and exciting nightlife. But it's not very well known (not yet, at least) as an ideal place to launch a startup.

The number of public funding schemes in Spain is limited and rigid, and its venture capital scene is very much underdeveloped, forcing startups to seek funding in the UK, Germany, or the US. Doing something as presumably straightforward as opening a bank account can become challenging because many branch employees don't speak English well enough, and banks will rarely give you documentation that's not in the Spanish language. BUT! Access to accelerators and investors has improved dramatically. The government's ENISA program has been greatly enhanced, becoming a very popular source of financing that's accessible to most new startups.

**ENCOMENDA**

They have been working in the startup industry for more than 20 years, launching companies, mentoring some of the most successful tech startups and investing as business angels in more than 100 projects. Thus they have launched Encomenda Smart Capital: a fund investing in seed digital companies with further resources and money but the same philosophy that we had as business angels. They help entrepreneurs for free in making strategic decisions, scaling organizations, implementing financial planning, defining new business opportunities, seeking new talent, analyzing their main KPIs and preparing their companies for next funding rounds. The initial investment ranges from 70K€ to 300K€, and we can invest up to 1M€ per company.

BARCELONA INSTITUTE OF SCIENCE AND TECHNOLOGY

The Barcelona Institute of Science and Technology is a scientific foundation of seven of Catalonia’s research centres of excellence. Its main objective is to build new scientific collaborations among these centres, thus giving impulse to multidisciplinary projects to push ever further the frontiers of knowledge.

CHAMBERS OF COMMERCE

One of the main priorities of the Spanish Chamber of Commerce is to support and foster foreign trade among Spanish businesses, given the importance of internationalisation as an essential means to improve business competitiveness and as a lever to reactivate the economy. In this sense, with the aim of supporting the initiation and diversification of Spanish businesses in their internationalisation processes, the Spanish Chamber of Commerce provides aid to companies through its advisory programmes as well as information and training to help them take the basic decisions needed to ensure their business’s internationalisation strategy is a success. Entrepreneurs starting up their activity have original business ideas and the ability to refine them.

camara.es
The Living lab space dedicated to research spans almost 2,000 m², and is the first interdisciplinary laboratory in Catalonia. It is committed to promoting the transfer of knowledge between university and business, and to helping develop some of today’s main technological challenges, such as the Internet of Things, Big Data and Smart Cities. The research and transfer projects will be conceived within spaces of creativity, will go through the R&D laboratory and will be validated from a perspective of the market and business.
